

ABOUT ACUITY

ACUITY, INC. CORPORATE OVERVIEW

Acuity is an entrepreneurial & market-responsive company, with a focus on providing **technical solutions** to federal agencies supporting the **National Security & Public Safety** mission.

In an industry driven by constant innovation, government agencies are challenged to simultaneously navigate the changing landscape, modernize their systems and IT environments, and increase cost efficiency. Acuity's service offerings are designed to help you meet the challenge. Our goal is to help you achieve greater mission impact with fewer over-extended resources.

Acuity, Inc., provides deep operational and technical expertise to help you modernize your information technology capabilities and information sharing practices to advance mission performance. By combining our methods, experience, reputation and leading practices with an award-winning culture, Acuity delivers measurable, meaningful, and mission-critical results.

REAL RESULTS. REALIZED.

Since 2002, Acuity has served nine of 15 cabinet-level agencies. Here's a snapshot of what we've been up to:

- Designed, tested and deployed a modernized data solution to back up information to secure remote locations. We successfully implemented the new solution to 260 sites worldwide and 7 backup centers, protecting over 800TB of production data
- Developed, operated and maintained an enterprise-wide SharePoint/.NET platform, supporting 21,000 agency personnel, over 100 mission-focused collaboration and business process automation applications, and 65+ content databases
- Identified several hundred findings of fraud, national security concerns and watchlist nominations by screening over 588,000 historical fingerprint enrollments. Our work has resulted in a 47% decrease in process cycle time, a 19% decrease in process cycle times, and increased triage speeds due to early detection of national security concerns

ABOUT ACUITY

ACUITY, INC. SERVICE OFFERINGS

Where Capability Meets Experience

Acuity
Your Vision | Our Focus

Delivering measurable client value with every engagement.

Acuity supports evolving mission requirements that require a full IT service lifecycle integrator and partner. We keep pace with new technology and help federal agencies maintain and adapt IT in support of the mission. With our support, federal agencies can manage and optimize complex technology landscapes to better support their mission, stakeholders and users.

DevSecOps

DEPLOY SECURE, QUALITY CODE FASTER WITH DEVSECOPS

While many departments have aligned their development and operations teams by implementing DevOps, too often security is overlooked until the final stages of development. Acuity partners with Federal agencies to implement a DevSecOps framework based on stakeholder engagement that results in better secured applications and improved mission performance.

IT Modernization

LEVERAGING DIGITAL TECHNOLOGY TO INCREASE MISSION IMPACT

Using a holistic approach, Acuity will assess your current environment, applications, challenges and needs. Our goal is to improve your mission outcomes through the best practices and lessons learned from supporting highly visible, secure, mission-critical projects across the Federal environment.

Data

HARNESSING THE POWER OF DATA TO ADVANCE YOUR SPEED TO MISSION

By converting both structured and unstructured data sources into transparent, meaningful, intelligence that can be acted upon by users at every level in your ecosystem, we help federal clients increase efficiency and advance their speed to mission.

Cyber

PROTECTING YOUR MISSION AND DATA WITH CYBER SECURITY

Acuity's experience within Federal agencies enables us to be keenly insightful, adept and thorough in our examination of your dynamic threat landscape, as well as flexible in pivoting to sudden changes in policies, mandates, and data demands.

IT Operations Support

KEEPING SYSTEMS AVAILABLE AND READY

Acuity helps you optimize your technology ecosystem to realize its combined, intended value, to continuously maintain compliance with federal IT mandates, increasing reliability without losing uptime.
