

ABOUT ACUITY

OVERVIEW

Acuity is a leading digital strategy consulting firm that supports the National Security & Public Safety mission.

Acuity offers deep domain and technical expertise to modernize your IT environment and advance mission performance. By combining our methods, experience, and leading practices with an award-winning culture, Acuity delivers measurable, meaningful, and mission-critical results.

REAL RESULTS. REALIZED.

Acuity has served 9 of 15 Cabinet-level agencies, supporting their journeys to automate, modernize, and transform IT environments.

Acuity supports a multi-tiered, cloud-based analytics platform and develops apps **enabling over 10,000 investigators to share data seamlessly**. We created a comprehensive database with **real-time analysis, boosting visibility and improving success in investigations**. Our Agile template serves as the **agency-wide standard** for new projects.

Our IT portfolio rationalization and modernization efforts **saved one agency over \$1.8M annually, eliminating outdated IT and reducing staffing needs**. Our enhanced resource utilization model **saved the agency an additional \$250K/year**, resulting in an annual **40.2% cost reduction**.

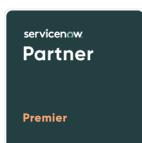

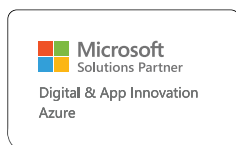

We created a **Departmental cyber security strategy** using FedRAMP documentation, inherited controls, Zero Trust drivers, and proprietary cyber hygiene processes. Implementation resulted in **transformed networks, automated secure cloud deployment**, and a robust **governance framework that enables faster app development** without compromising security.

TECHNICAL EXPERTISE & INNOVATION

Acuity's **Innovation Lab** develops cutting-edge solutions via prototypes and proof-of-concepts in partnership with our customers to address complex mission and business use cases. Our **three Centers of Excellence** promote collaboration and access to experts in AWS, Microsoft, and ServiceNow. Our **Technology Solutions Group** (TSG) provides expert guidance on the latest technologies, engineering practices, and program strategies, ensuring your projects benefit from the newest technology.

SERVICE OFFERINGS

Where Capability Meets Experience

Delivering measurable client value every step of the way.

Acuity supports evolving mission requirements that require a full IT service lifecycle integrator and mission partner. Beginning with HCD, we help federal agencies design, manage, and optimize complex technology landscapes to better support their mission, stakeholders and end-user communities.

DevSecOps

FASTER DEPLOYMENT OF SECURE, QUALITY CODE

Acuity's approach focuses on maturing our client's DevSecOps culture to foster collaboration and shared accountability among operations, development, and security. It accelerates delivery velocity, enforces quality control, and increases compliance. Our Agile DevSecOps approach ensures secure, user-friendly, intuitive solutions, quick MVPs, and improved mission performance.

IT Modernization

TRANSFORMATIVE MISSION RESULTS

Our IT modernization approach blends Agile, HCD, and UI/UX best practices. Customers gain shorter time-to-mission, lower-risk implementations, and satisfied end users. Our holistic approach assesses your current environment, providing mission-aligned resources for success. Where possible, we apply low / no code solutions to reduce costs and improve security and enhance efficiency.

Data

INTEGRATED, ACTIONABLE DATA

Acuity enables democratization of data, empowering users at all operational levels with meaningful intelligence. Using AI/ML, we perform real-time analytics, transforming structured and unstructured data into actionable insights and transparent, user friendly visualizations. Our solutions help federal clients boost efficiency and advance their mission objectives.

Cyber

PROACTIVE SECURITY WITH ZERO TRUST

Having collaborated with CISA, OMB and NIST to create a Zero Trust overlay mapping to the SP 800-53 controls, Acuity actively supports agencies on their Zero Trust journey. Acuity's extensive Federal experience, combined with our ability to rapidly adapt to changes in policies, mandates, and data requirements, positions us with the expertise necessary to navigate the evolving cyber threat landscape and help agencies comply with the ZT mandate.

IT Operations

OPTIMIZE YOUR TECHNOLOGY ECOSYSTEM

Acuity provides 24/7/365 performance monitoring and complex Tier 2/3 support for Microsoft 365, Azure, AWS, and ServiceNow applications and systems. We also maintain legacy systems (e.g., .NET, Java, Oracle), helping prioritize enhancements and modernization. Our teams oversee configuration, infrastructure, database, and release management, optimizing operational and service availability resulting in enhanced efficiency, security and mission effectiveness.
